

Declaration Of Consent for the Recording and Processing of Interview Data

Background

The interviews conducted as part of the research project "ELSI by Design" (as described orally) by Prof. Dr. Stefan Bente are recorded with a recording device, and then put into writing.

For the further scientific evaluation of the interview texts, all information that could lead to an identification of the interviewee, of organisations mentioned in the interview, as well as of projects, products or research projects discussed in the interview will be changed or removed from the text. The transcript of the interview is intended for analytical purposes only and will not be published in its entirety.

In scientific publications, interviews are quoted only in brief extracts. The citation method will ensure that it is not possible to identify the person interviewed, the organisations mentioned or the projects, products or research projects discussed.

Personal contact data will be stored separately from interview data and inaccessible to third parties.

Declaration of Consent

I agree to participate in the survey in the context of the research project mentioned above. In addition, I accept the above-mentioned form of anonymous processing and scientific exploitation of the interview conducted with me and the resulting data or information.

I am aware that I may revoke this consent at any time against Prof. Dr. Bente, with the result that the processing of my personal data by Prof. Dr. Bente in accordance with the declaration of revocation will be inadmissible for the future. This does not, however, affect the legality of the processing which took place on the basis of the consent up to the revocation.

First name; surname in block letters

Place, date / signature
